QUICK START GUIDE
Installing SyncMo

Pick your Operating System

MacOS 12.3 or above

Windows 10 or 11

Check your Windows version and processor type

Compatible Windows OS

Windows 10   **Windows 11**

NOTE: Please update to Windows version 10 or above in order to use SyncMo

Type of Processor your computer has:

Intel Core i5 or equivalent

At least 4GB of Ram

A reasonably mid-level processor is required for SyncMo to operate correctly

We do not recommend using SyncMo on Netbooks or devices with less than 1.8Ghz and 2-4 CPU cores

Please contact support if you are unsure whether your computer meets these requirements

Step 2

Once you know which OS and processor you have, download the correct version of the software

You can download it from the website or by clicking the links below

**Download for macOS
(Apple Silicon, M1/M2)**

**Download for macOS
(Apple Intel)**

**Download for Windows
(x64)**

Once the Installer exe file has finished downloading…

Go to downloads and open it to start the installer

Once the installer is open follow the Instructions and complete the installation.

You can then launch SyncMo from your desktop, taskbar, or start menu.

Once the Installer pkg file is downloaded

Go to downloads and open it to start the installer
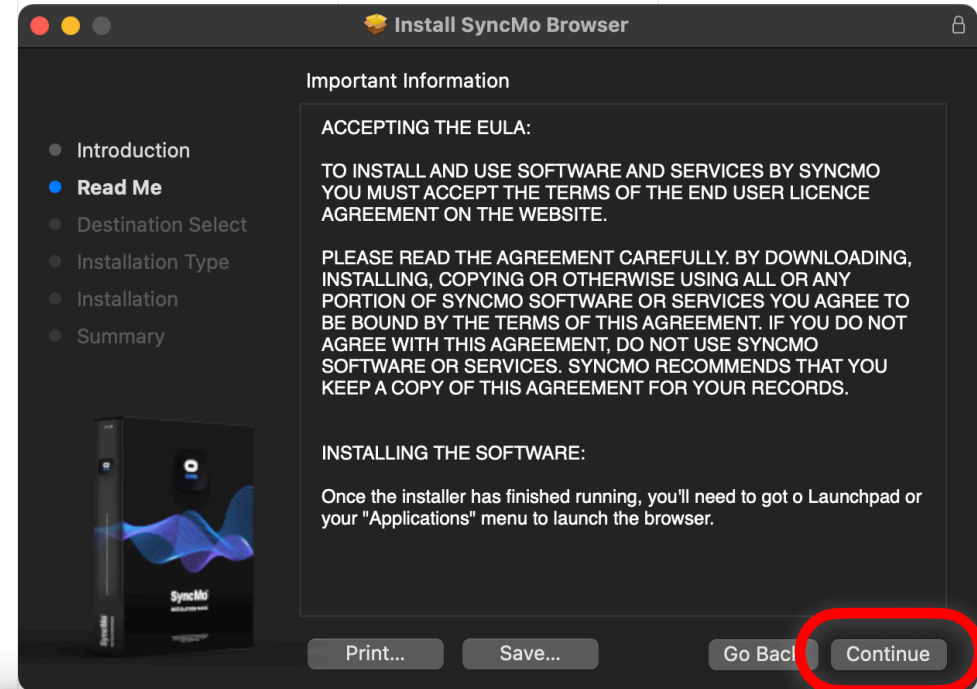

Once the installer is open follow the Instructions
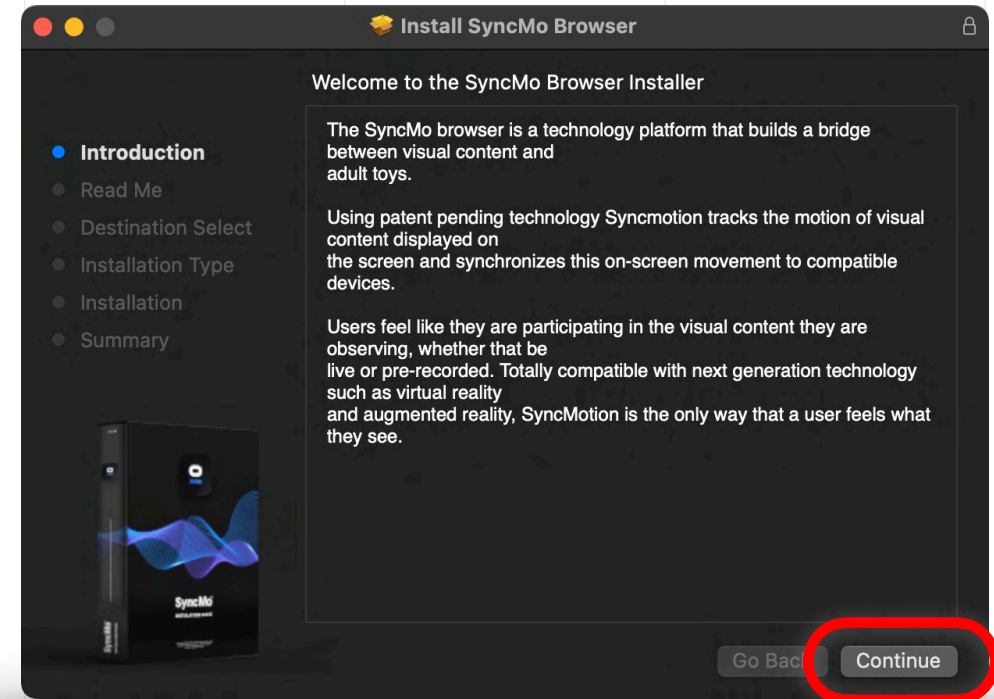

Read Me

Please read and ensure that you accept our EULA on the website before continuing.

Once you are sure,

Press **Continue**

🔶 **Install SyncMo Browser**

- **Summary**

✓

The installation was successful.

The software was installed.

Go Back   Close
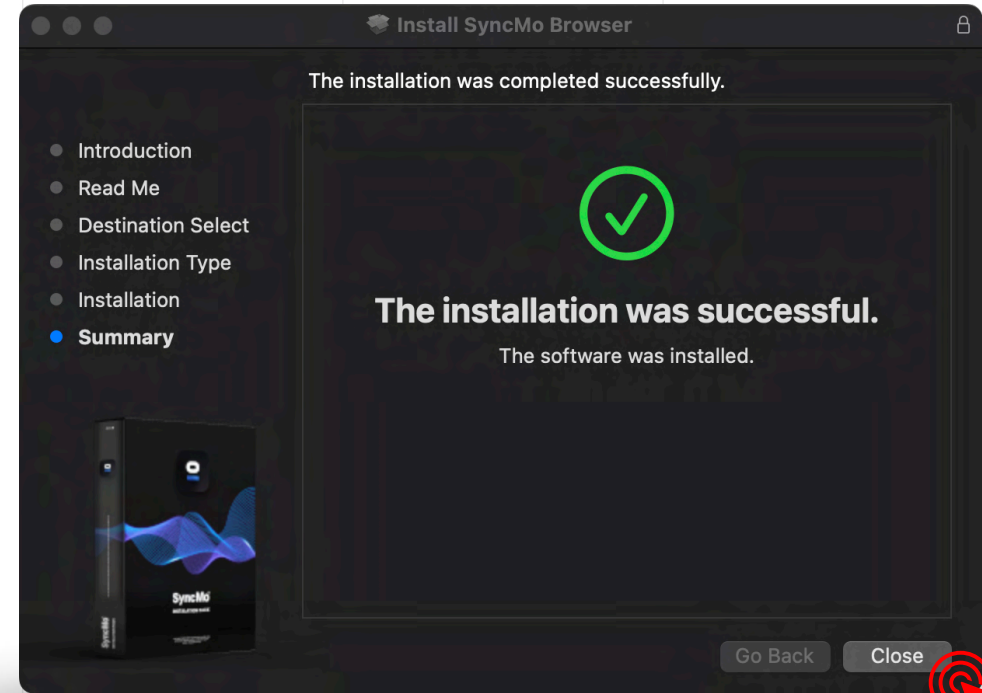

MacOS may ask you whether you wish to keep the installer

Keep: this will keep the PKG in your downloads

Move to Bin: this will move the PKG from downloads to Trash

After you choose an option the installer will close

Do you want to move the "SyncMo Browser" Installer to the Bin?

To keep this package in its current location, click Keep.
Keep   Move to Bin

To launch SyncMo

Open the Launchpad on your desktop, by choosing this icon in the Dock at the bottom of your screen
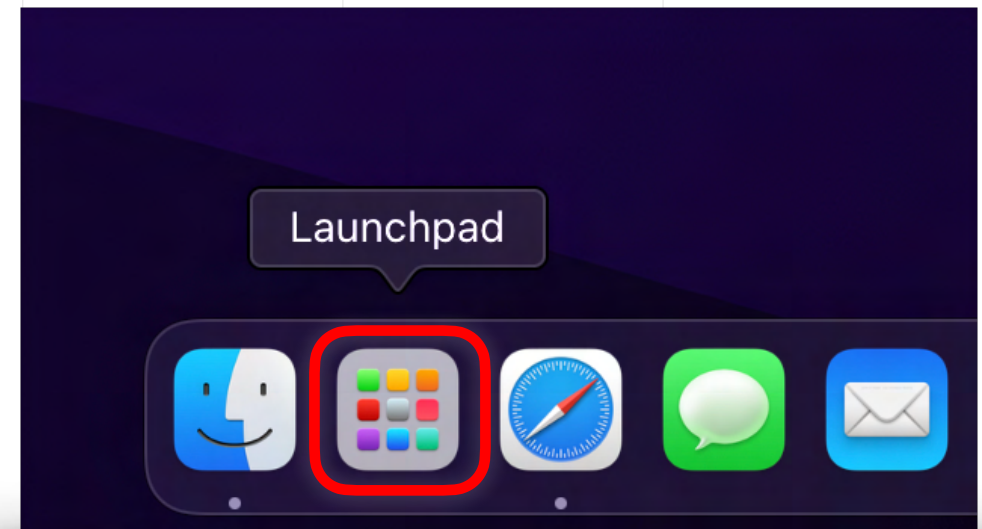

Step 4.1   MAC VERSION

Once you have opened the Launchpad you will find the **SyncMo icon** with your other apps
SyncMo Browser launch page will open

If you have received your license key

Select **Enter license key**

*Note: If you do not have a license key, you can **purchase** one to activate the software here*
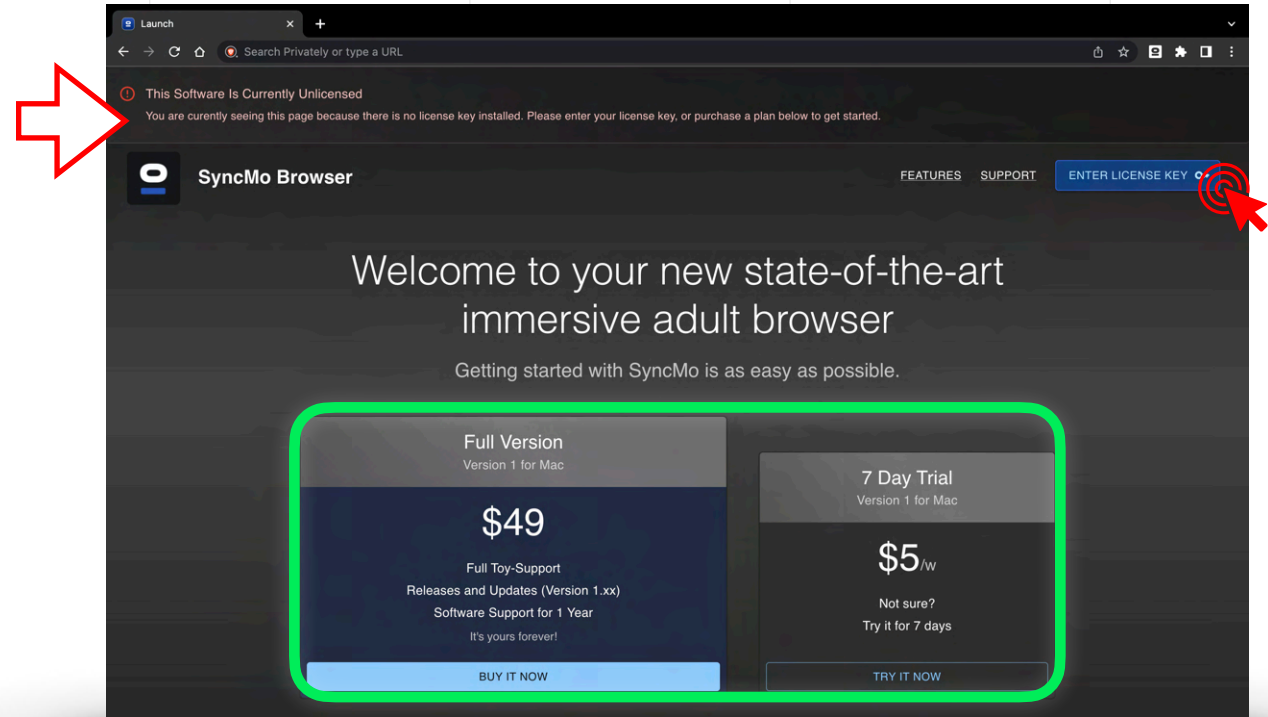

Step 5.1

Please enter your **email address** and **license key**

Then press [**Activate License**]
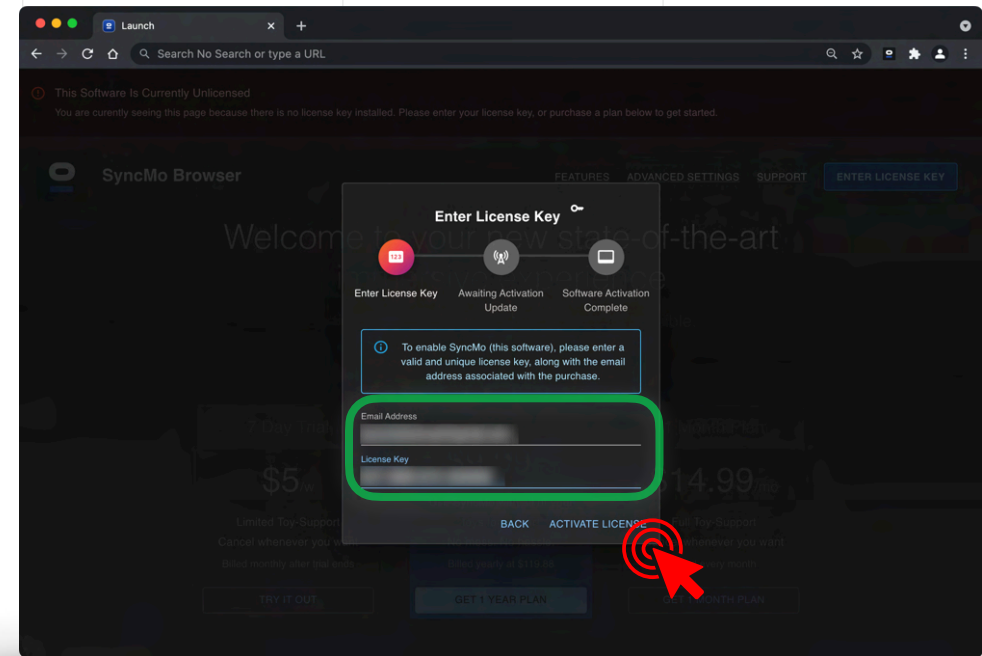

Authorisation is now complete

Press **Close**
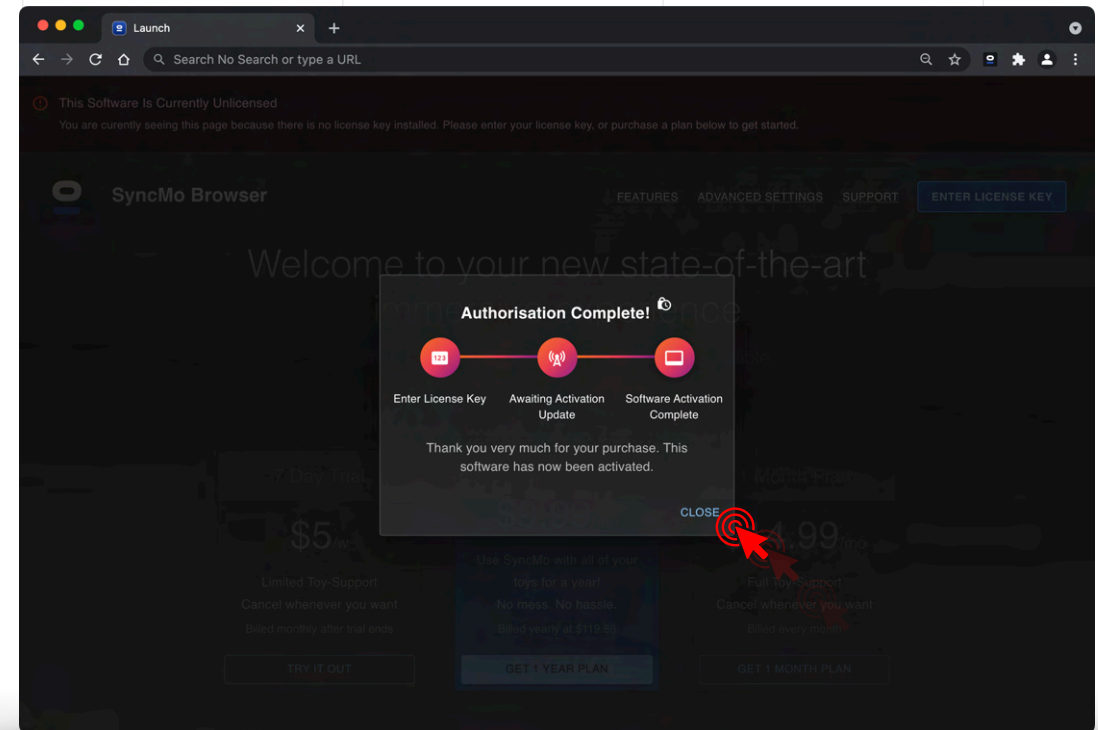

Now SyncMo is activated

Press the SyncMo Icon in the navigation bar
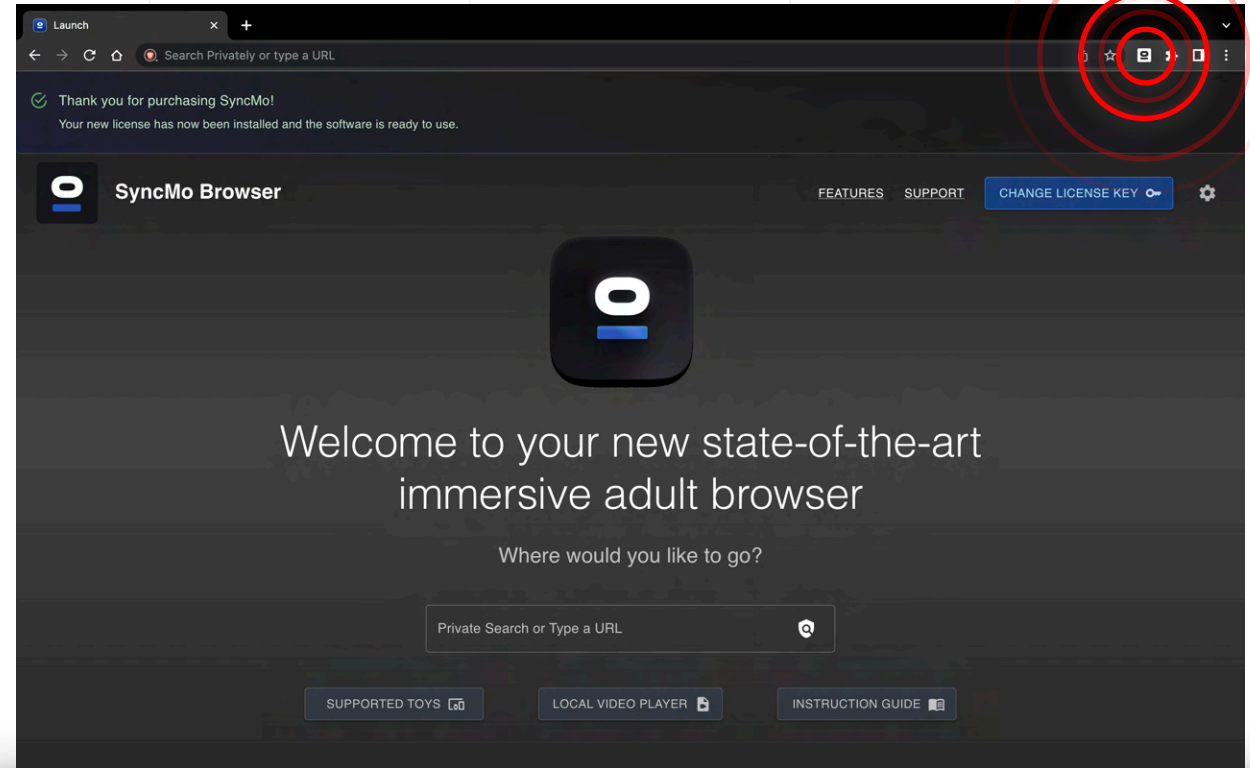

The Adult Toy Settings window will open below

This is where you can add and configure your adult toys
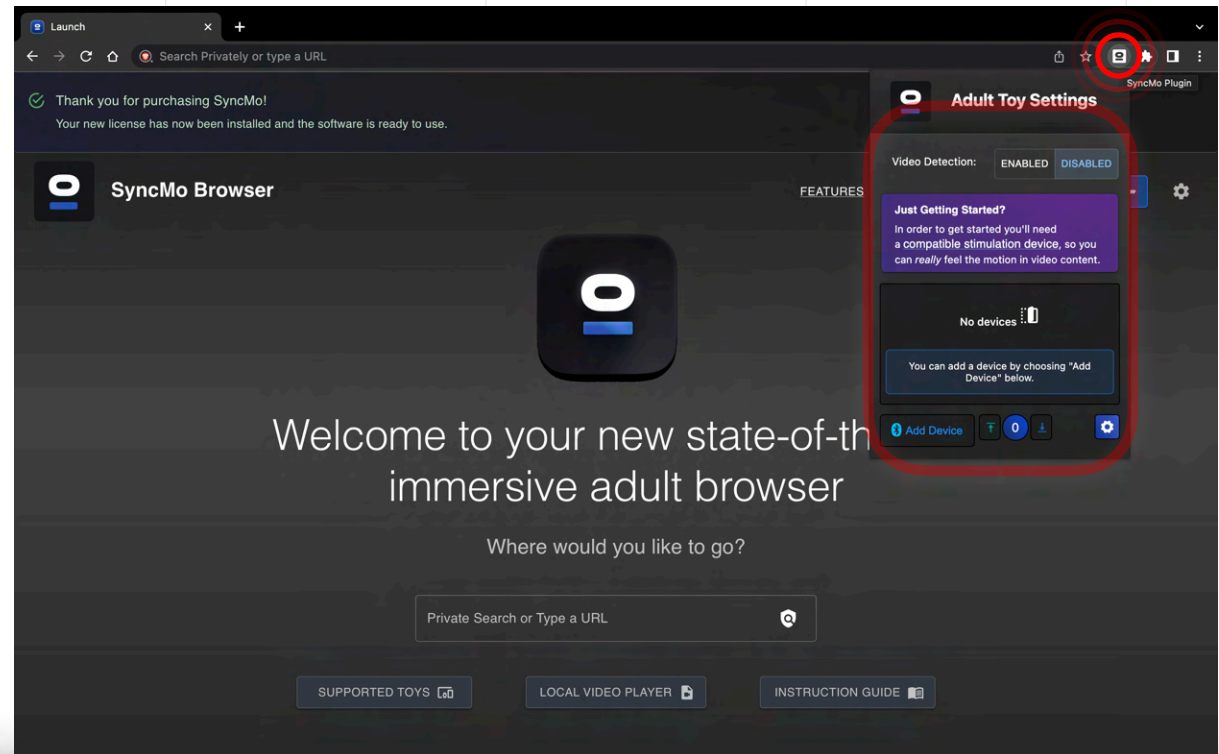

In **Adult Toy Settings** enable video detection

Select [**Enabled**]

Please make sure that your computer has Bluetooth is turned on

Please also make sure your adult toy is switched on and is in **discovery mode**

Then in Adult Toy Settings select [**Add Device**]
SyncMo will now search for devices

Your adult toy will appear under the search section. Select the adult toy to connect

If you do not see your device, please make sure your adult toy is switched on and is in **discovery mode**.

Usually this causes the bluetooth light to flash on the device. Please check your device manual for details.
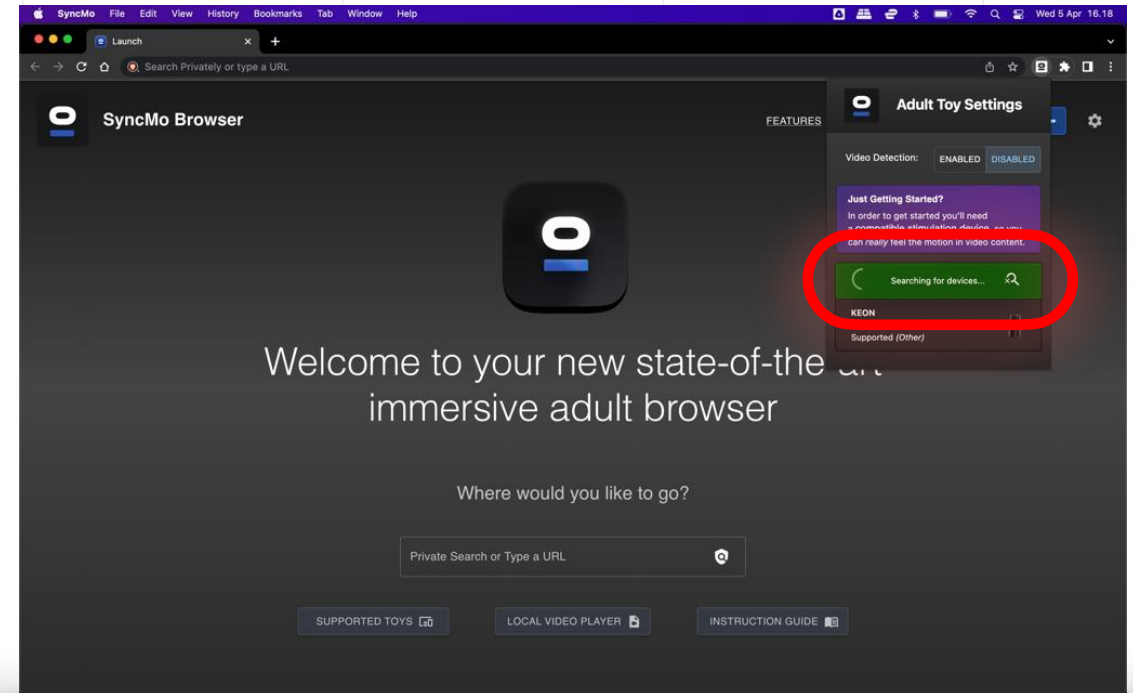

NOTE FOR MACOS USERS: During the first time you add a device you may be asked by macOS to give SyncMo permission to use Bluetooth

Step 6.4

Once your adult toy is connected the section will be green and say connected
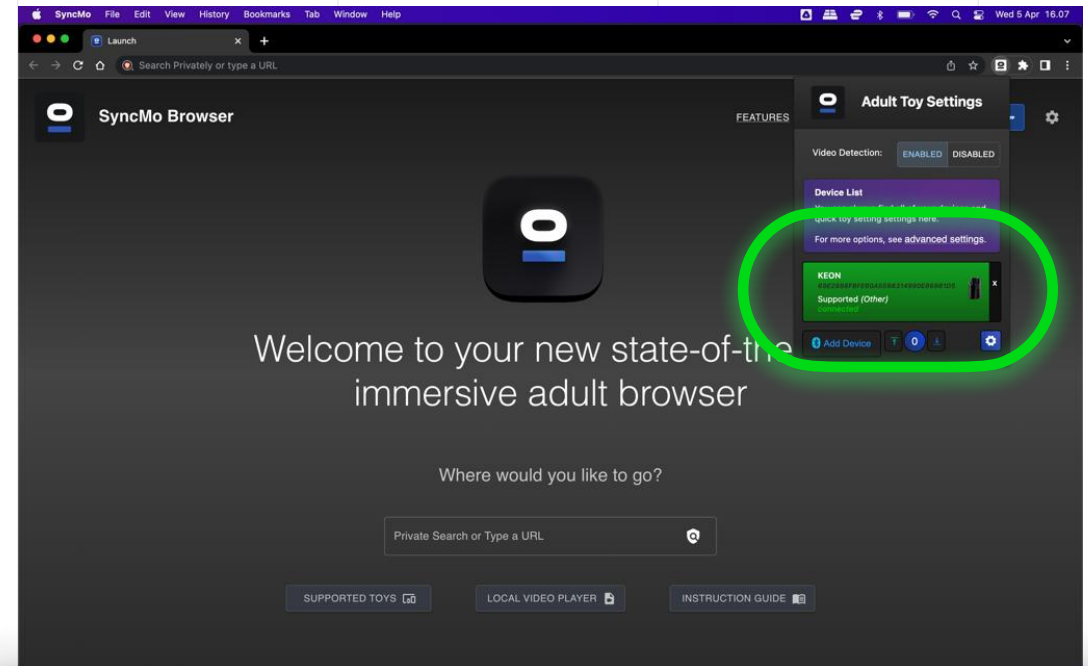

Now your toy is connected

You can **test your adult toy** to make sure it is receiving commands from SyncMo.

Simply use the up and down buttons at the bottom of the Adult Toy Settings window while the toy is connected, and the device should begin to move, vibrate, pulsate, heat-up, squeeze or suction, depending on the device you have purchased.
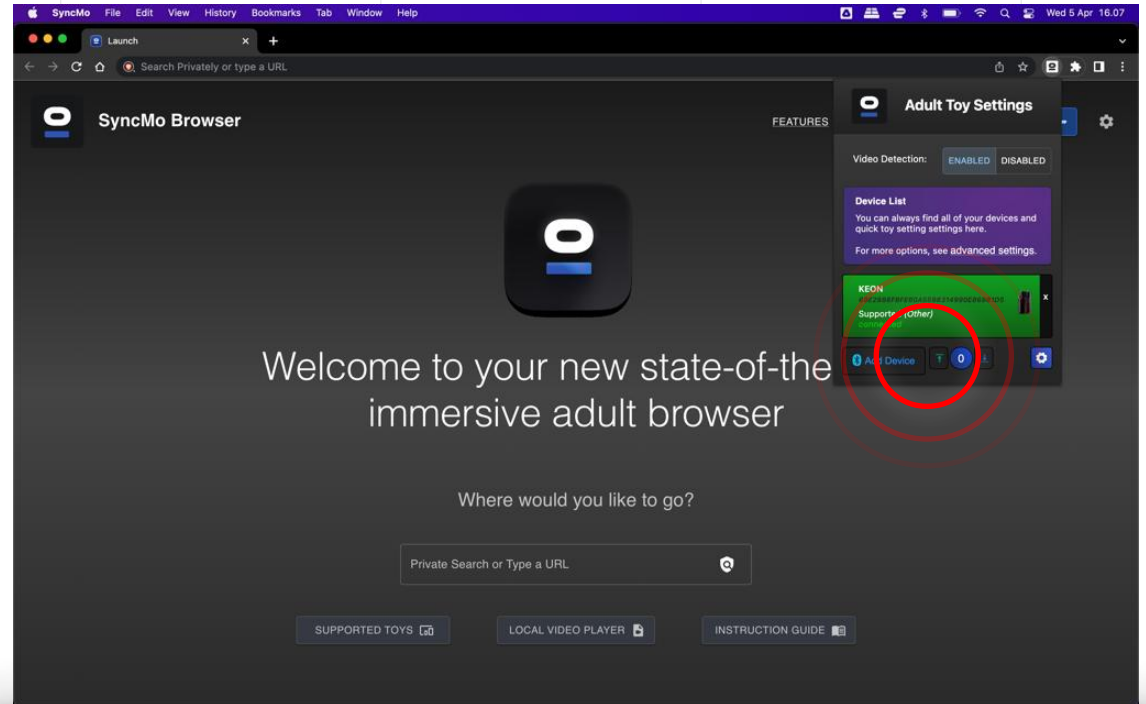

If you press the settings button to the right of the speed test buttons, you will find some quick settings for controlling how SyncMo reacts to content

Action Sensitivity

HIGH

High – Very reactive to any movement to start toy speeds

MED

Med – Requires Med motion to start toy speed activity

LOW

Low – Requires High motion to start toy speed activity

Cruise Control

STOP

Stop. When there is no movement your toy will stop

CRUISE

Cruise. When the tracked movement is 0 the toy will keep a minimum speed (custom or speed 1) until speed activity starts again(This is to maintain arousal until the action picks up again)

HIGH

High. This means when the tracked movement is 0 the toy will keep a higher speed (Speed 2) until speed activity starts again
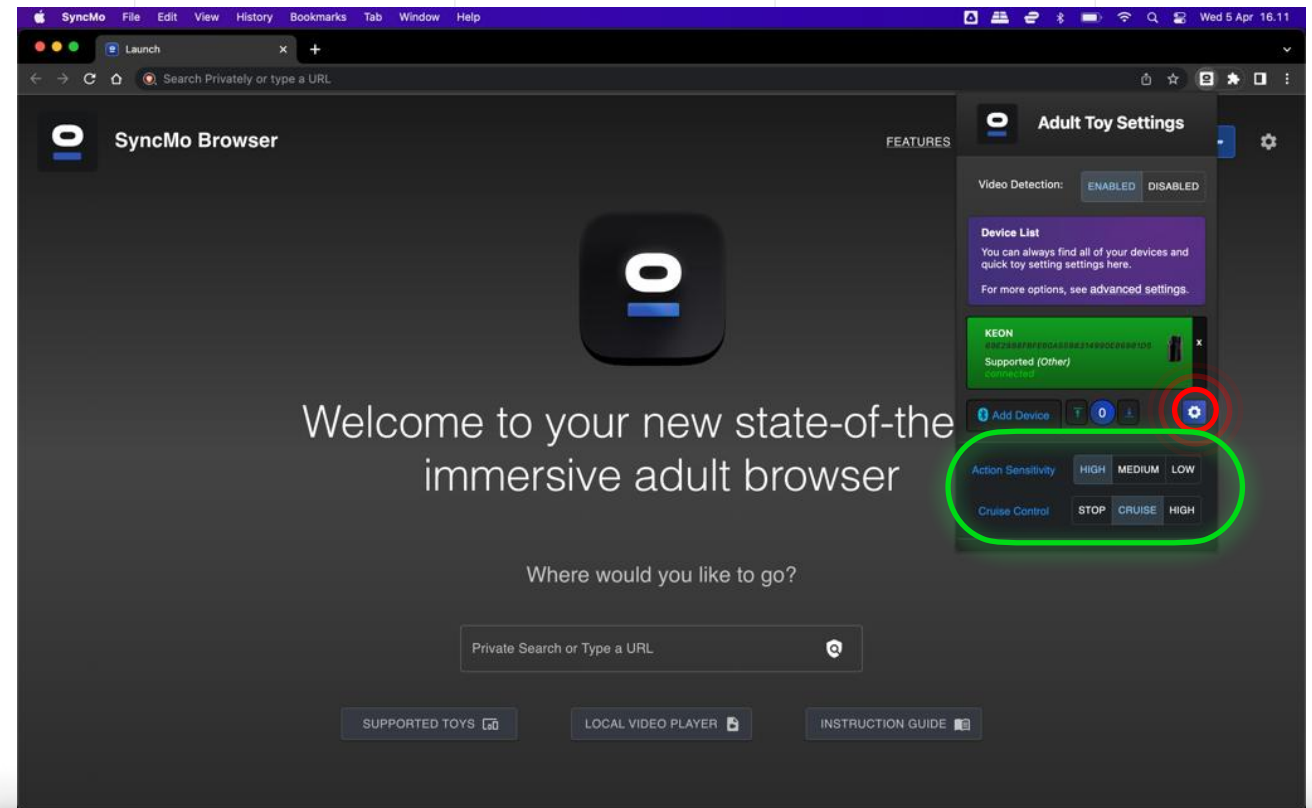

Once you are ready simply choose some content you want to watch

Type in the **search bar** the type of content or website you wish to watch. Searches are private and secure.

You can also simply use the address bar at the top of the window.

Our software runs only on your local computer. Nothing is sent to us, and we are not involved in any of your usage of our software.
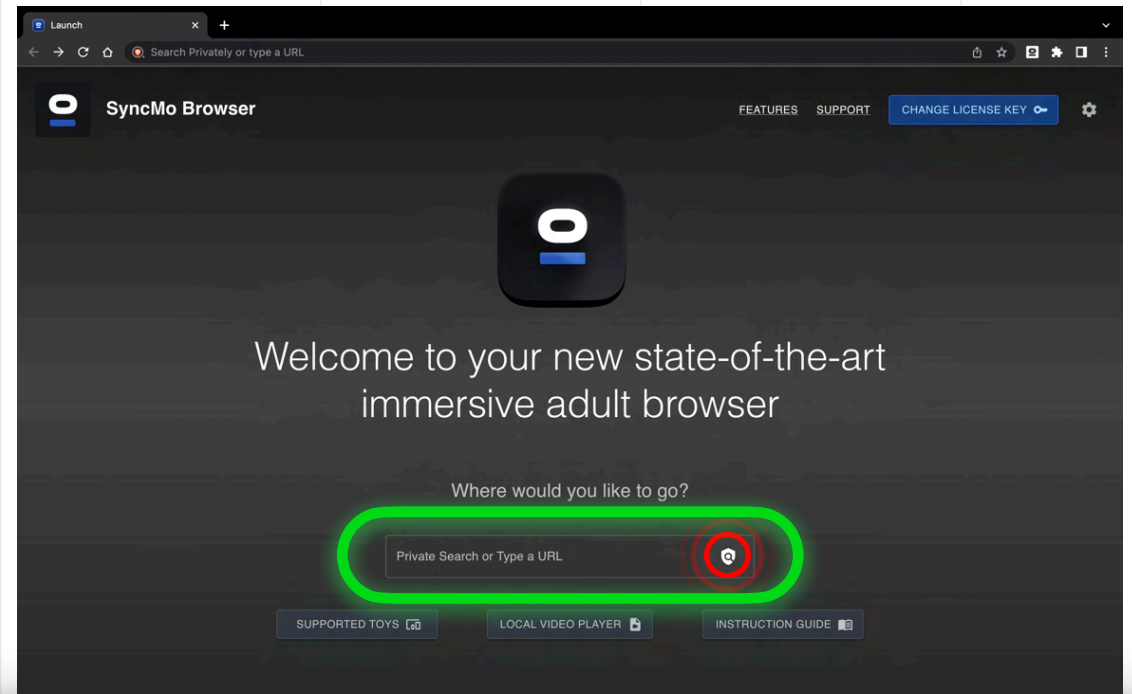

# When you are watch video content or live streams, a video overlay will appear in the top left of the video

When you stop or pause the video, the display will say **Stopped** and your toy will stop.
When there is no activity, the display will show **Cruise Control** until activity starts. By default your toy will attempt to maintain arousal during periods of no action. If you would like you device to stop completely, or to do more during these periods, you can change the Cruise Control setting in the **Adult Toy Settings** window as shown earlier in this manual.
> NOTE: If you are not ready to start using the toy until later in the content, you can click the video overlay, and it will change to **Paused** – this will pause control of your sexual device until you are ready to begin. When you ready, simply press it again to resume.
When your toy is receiving speeds in sync with the action you are watching the display will say **Activity**
When you toggle the video forward or back to play a certain section when you have stopped toggling the system will recalibrate the tracking and then resume this takes a few seconds – the display will say **Recalibrating**
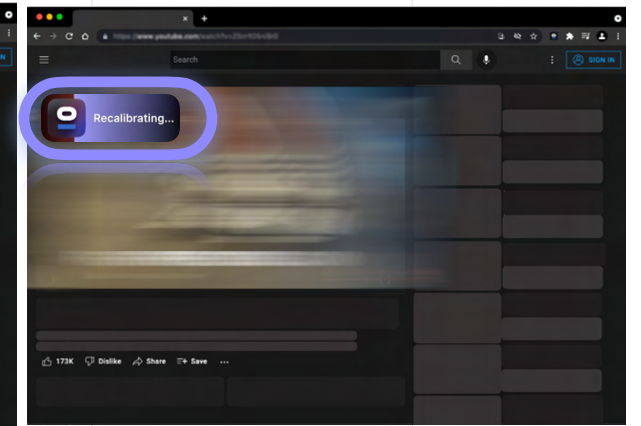

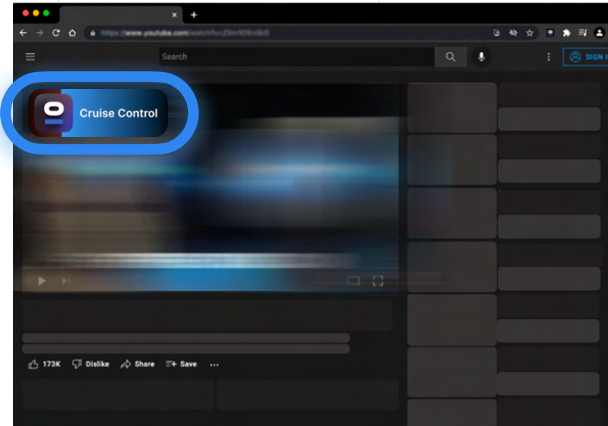

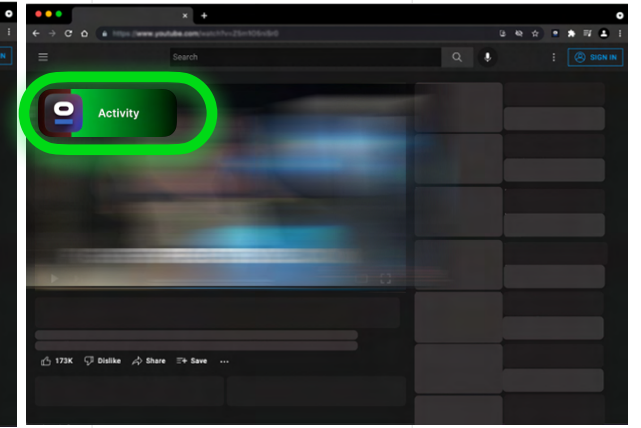

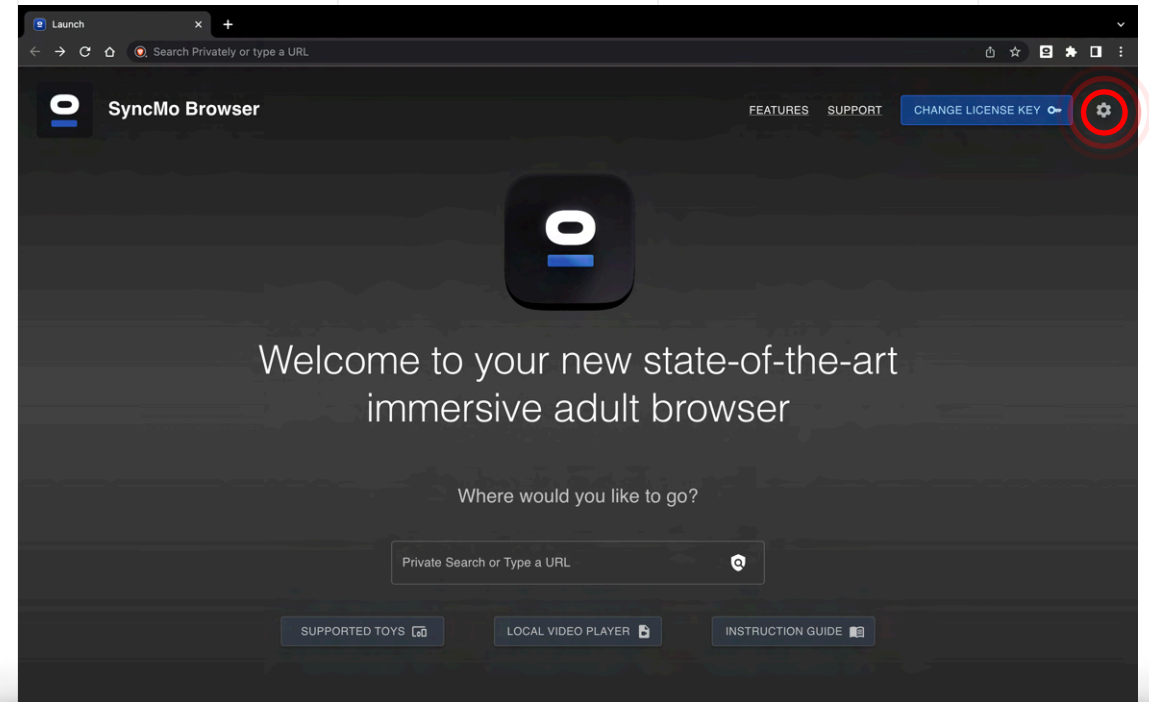

You can access Advanced Settings by selecting the icon on the launch page

(to the right of change license key button)

The advance settings menu will open in a new tab

Advanced Content Settings

Click ⊙ to expand the menu and to auto-enable video detection and analysis

Show Video Control: Here you can choose to show or hide the video overlay.

Hide Video Control in Fullscreen: You can also choose just to hide the overlay when in full screen mode.

Video Control Style: You can also choose the video overlay style. **Full** shows a full textual and graphical overlay, and **Compact** simply shows a discreet graphical overlay which uses colours to show different statuses.
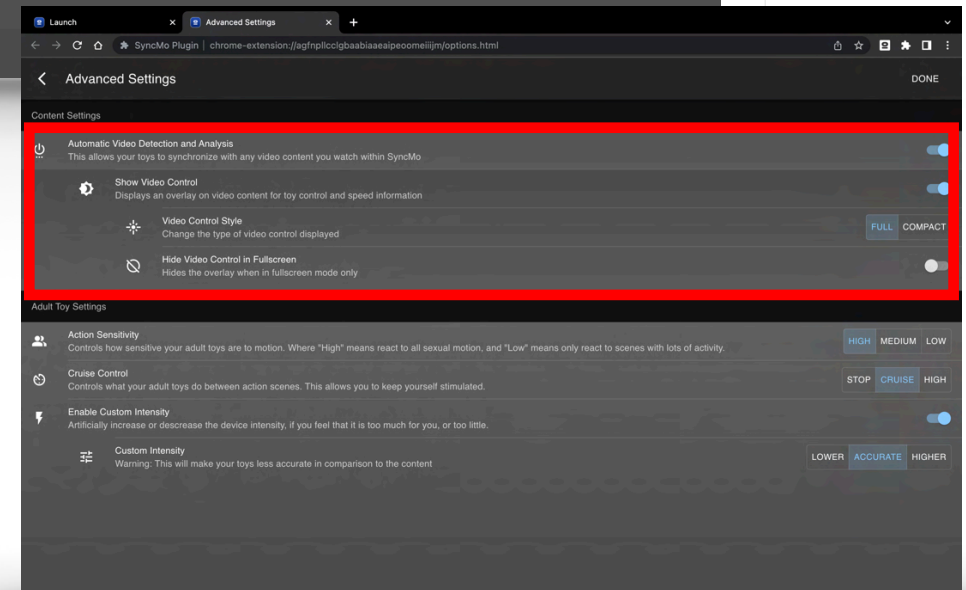

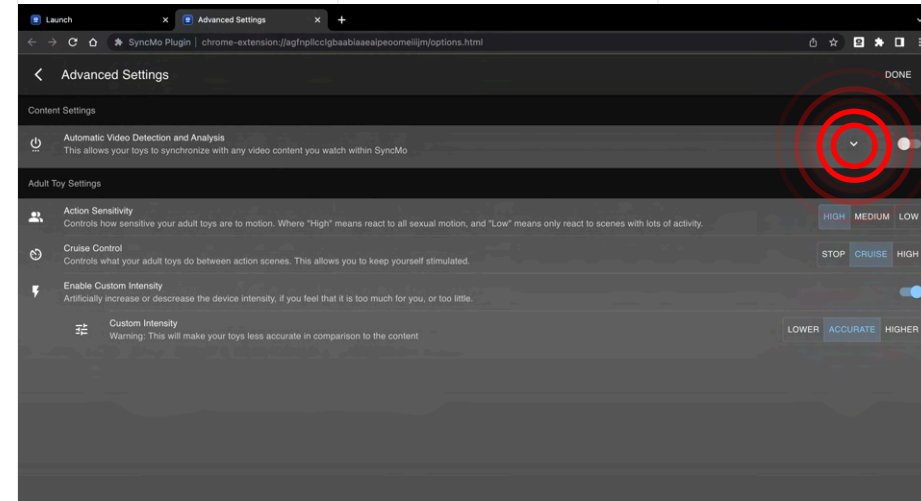

Advanced Toy Settings

Here you can control how your adult toy reacts to the content you are watching

Action Sensitivity: You can choose how sensitive your toy is to motion.

Cruise Control: You can also choose what your toy does when the motion stops between scenes.

Enable Custom Intensity: You can artificially increase or decrease the commands sent to your toy, if you are either finding it hard to last long during content, or finding reactions to content not enough to maintain arousal
(*Warning*: *This will make your toy inaccurate in relation to the content*)
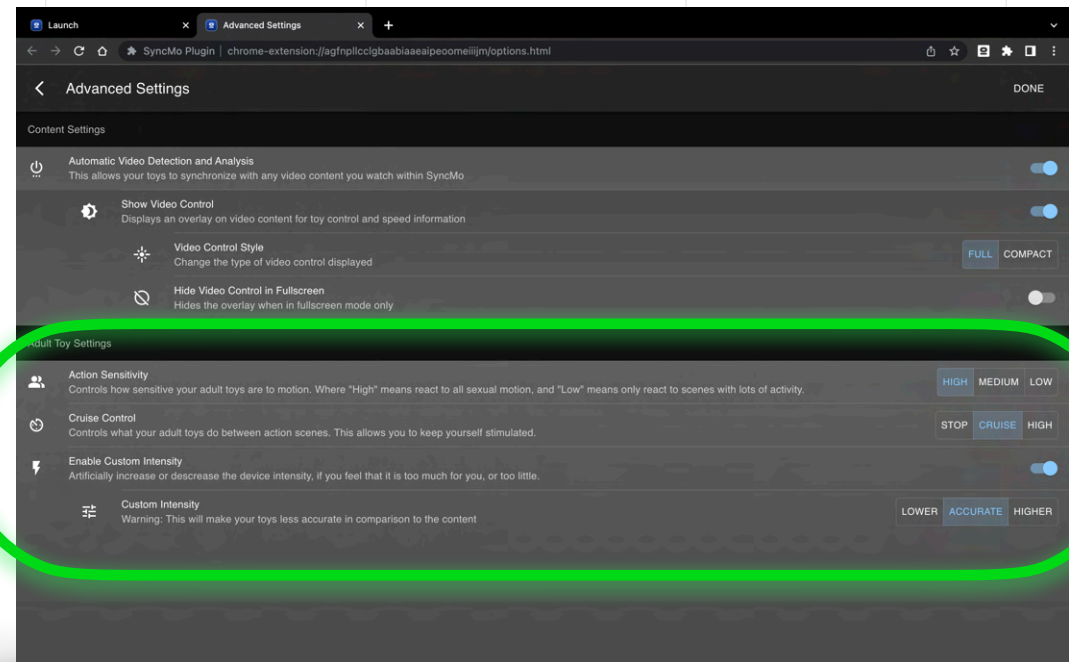

To play your own local video files, choose Local Video Player on the launch page
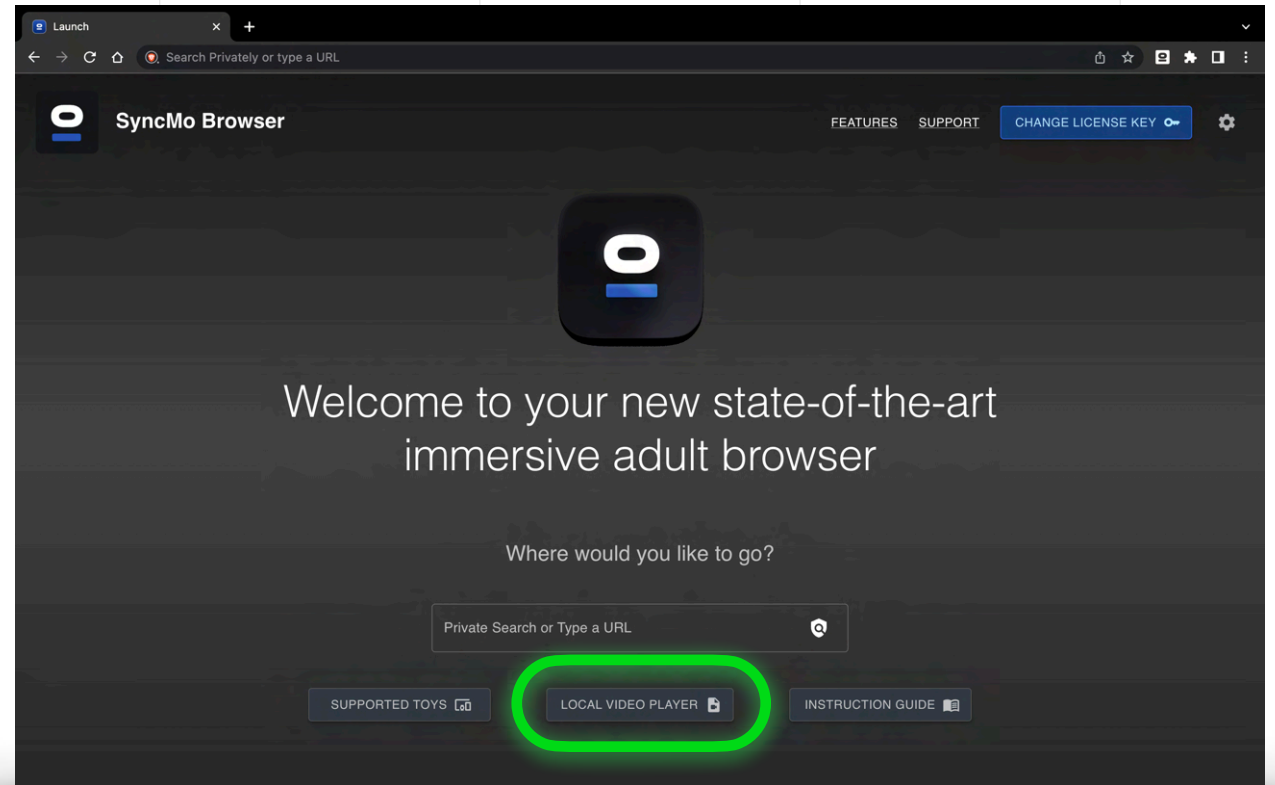

Click on the Player to select your videos

You can select multiple videos in the same folder, or you can add videos one by one to create a playlist (by clicking the "**+**" sign at the top of the playlist).
